

DORMITORIES

The Vision:

The girls' dormitory was built in the 1960's and minimal upgrades have been made through the decades. Functional and cosmetic improvements are desperately needed, and work was begun in the summer of 2021 on 3rd floor. We plan to renovate 2nd floor in 2022, and 1st floor in 2023.

During the summer of 2018 the Boys' Dormitory was renovated, but now the dorm needs a new boiler system. The bulk of the dormitory budget will go to upgrade the girls' dormitory, with only a small portion going to the boys' dorm for boilers.

Proposed Renovations for the Girls' Dorm:

- ✔ New roof
- ✔ New boiler system (for both Boys' and Girls' Dormitories)
- ✔ New energy efficient windows throughout
- ✔ New bathrooms and shower rooms
- ✔ New sinks, faucets & vanity mirrors in dormitory rooms
- ✔ New custom cabinetry throughout
- ✔ New electrical outlets in dorm rooms, including rewiring to be closer to desks
- ✔ New lighting over sinks and desks in dormitory rooms
- ✔ New mini blinds, curtain rods, and towel racks in dorm rooms
- ✔ New doors, locks and hardware throughout
- ✔ New carpeting throughout
- ✔ Fresh paint throughout
- ✔ New furnishings and décor in both lobbies
- ✔ New washing machines and driers in the laundry room

We think you'll agree, it is time to modernize the bathrooms & Kitchenette!

Summer of 2021 3rd Floor Renovations:
New custom-built cabinets in the students' rooms and new paint and carpet in the hallways.
